

A Hitchhikers Guide to the Black Arts (of Earth system modelling)

III+IV: readme

You will need to download a new *restart* file prior to embarking on sessions III and IV.

To fetch this: Change to the `cgenie_output` directory, and type:

```
$ wget http://www.seao2.info/cgenie/labs/Caltech.2013/EXAMPLE.worjh2.Caoetal2009.SPIN.tar.gz
```

This downloads an archived/compressed copy of the restart
(`EXAMPLE.worjh2.Caoetal2009.SPIN.tar.gz`) from a location on the interweb. Extract the
contents of this archive by typing:

```
$ tar xfzv EXAMPLE.worjh2.Caoetal2009.SPIN.tar.gz
```

You will need to make a code 'update' by typing, from the `cgenie` directory:

```
$ svn update
```

You'll then need to change directory back to `genie-main` to run the model.
