

# ERC Consolidator Grant workshop

(project background, interview, and tales of Eurostar woe)

# *ERC Consolidator Grant workshop*

ERC 'success' statistics of ERC-2013-CoG-617313

**( $n = 1 \dots$ )**

# ERC Consolidator Grant workshop

**PALEOGENE**  
version 0.1  
(2011 submission)

- ★ Was cooked up in about 72 hours. While ill. At a conference.
- ★ Was very poorly written. Basically just a bunch of dull-sounding model developments (as noted by a panel member).
- ★ **Had no 'data' ...**
- ★ (Rightly died at the 1st stage.)

# ERC Consolidator Grant workshop

## 'COOL'

(2010 NERC  
directed program  
consortium bid)

- ★ Poorly focussed – had too many disparate elements that did not mesh.
- ★ Failed at full bid stage.
- ★ But ... had a strong and novel strategy for linking biotic records to past environmental change.  
(**'data'**)

## PALEOGENE

version 0.1  
(2011 submission)

# ERC Consolidator Grant workshop

**'COOL'**

(2010 NERC  
directed program  
consortium bid)

**PALEOGENE**

version 0.1  
(2011 submission)

**PALEOGENE**

version 1.0  
(2013 submission)

★ Still rushed. Many many typos in the text. Figures could have been better.

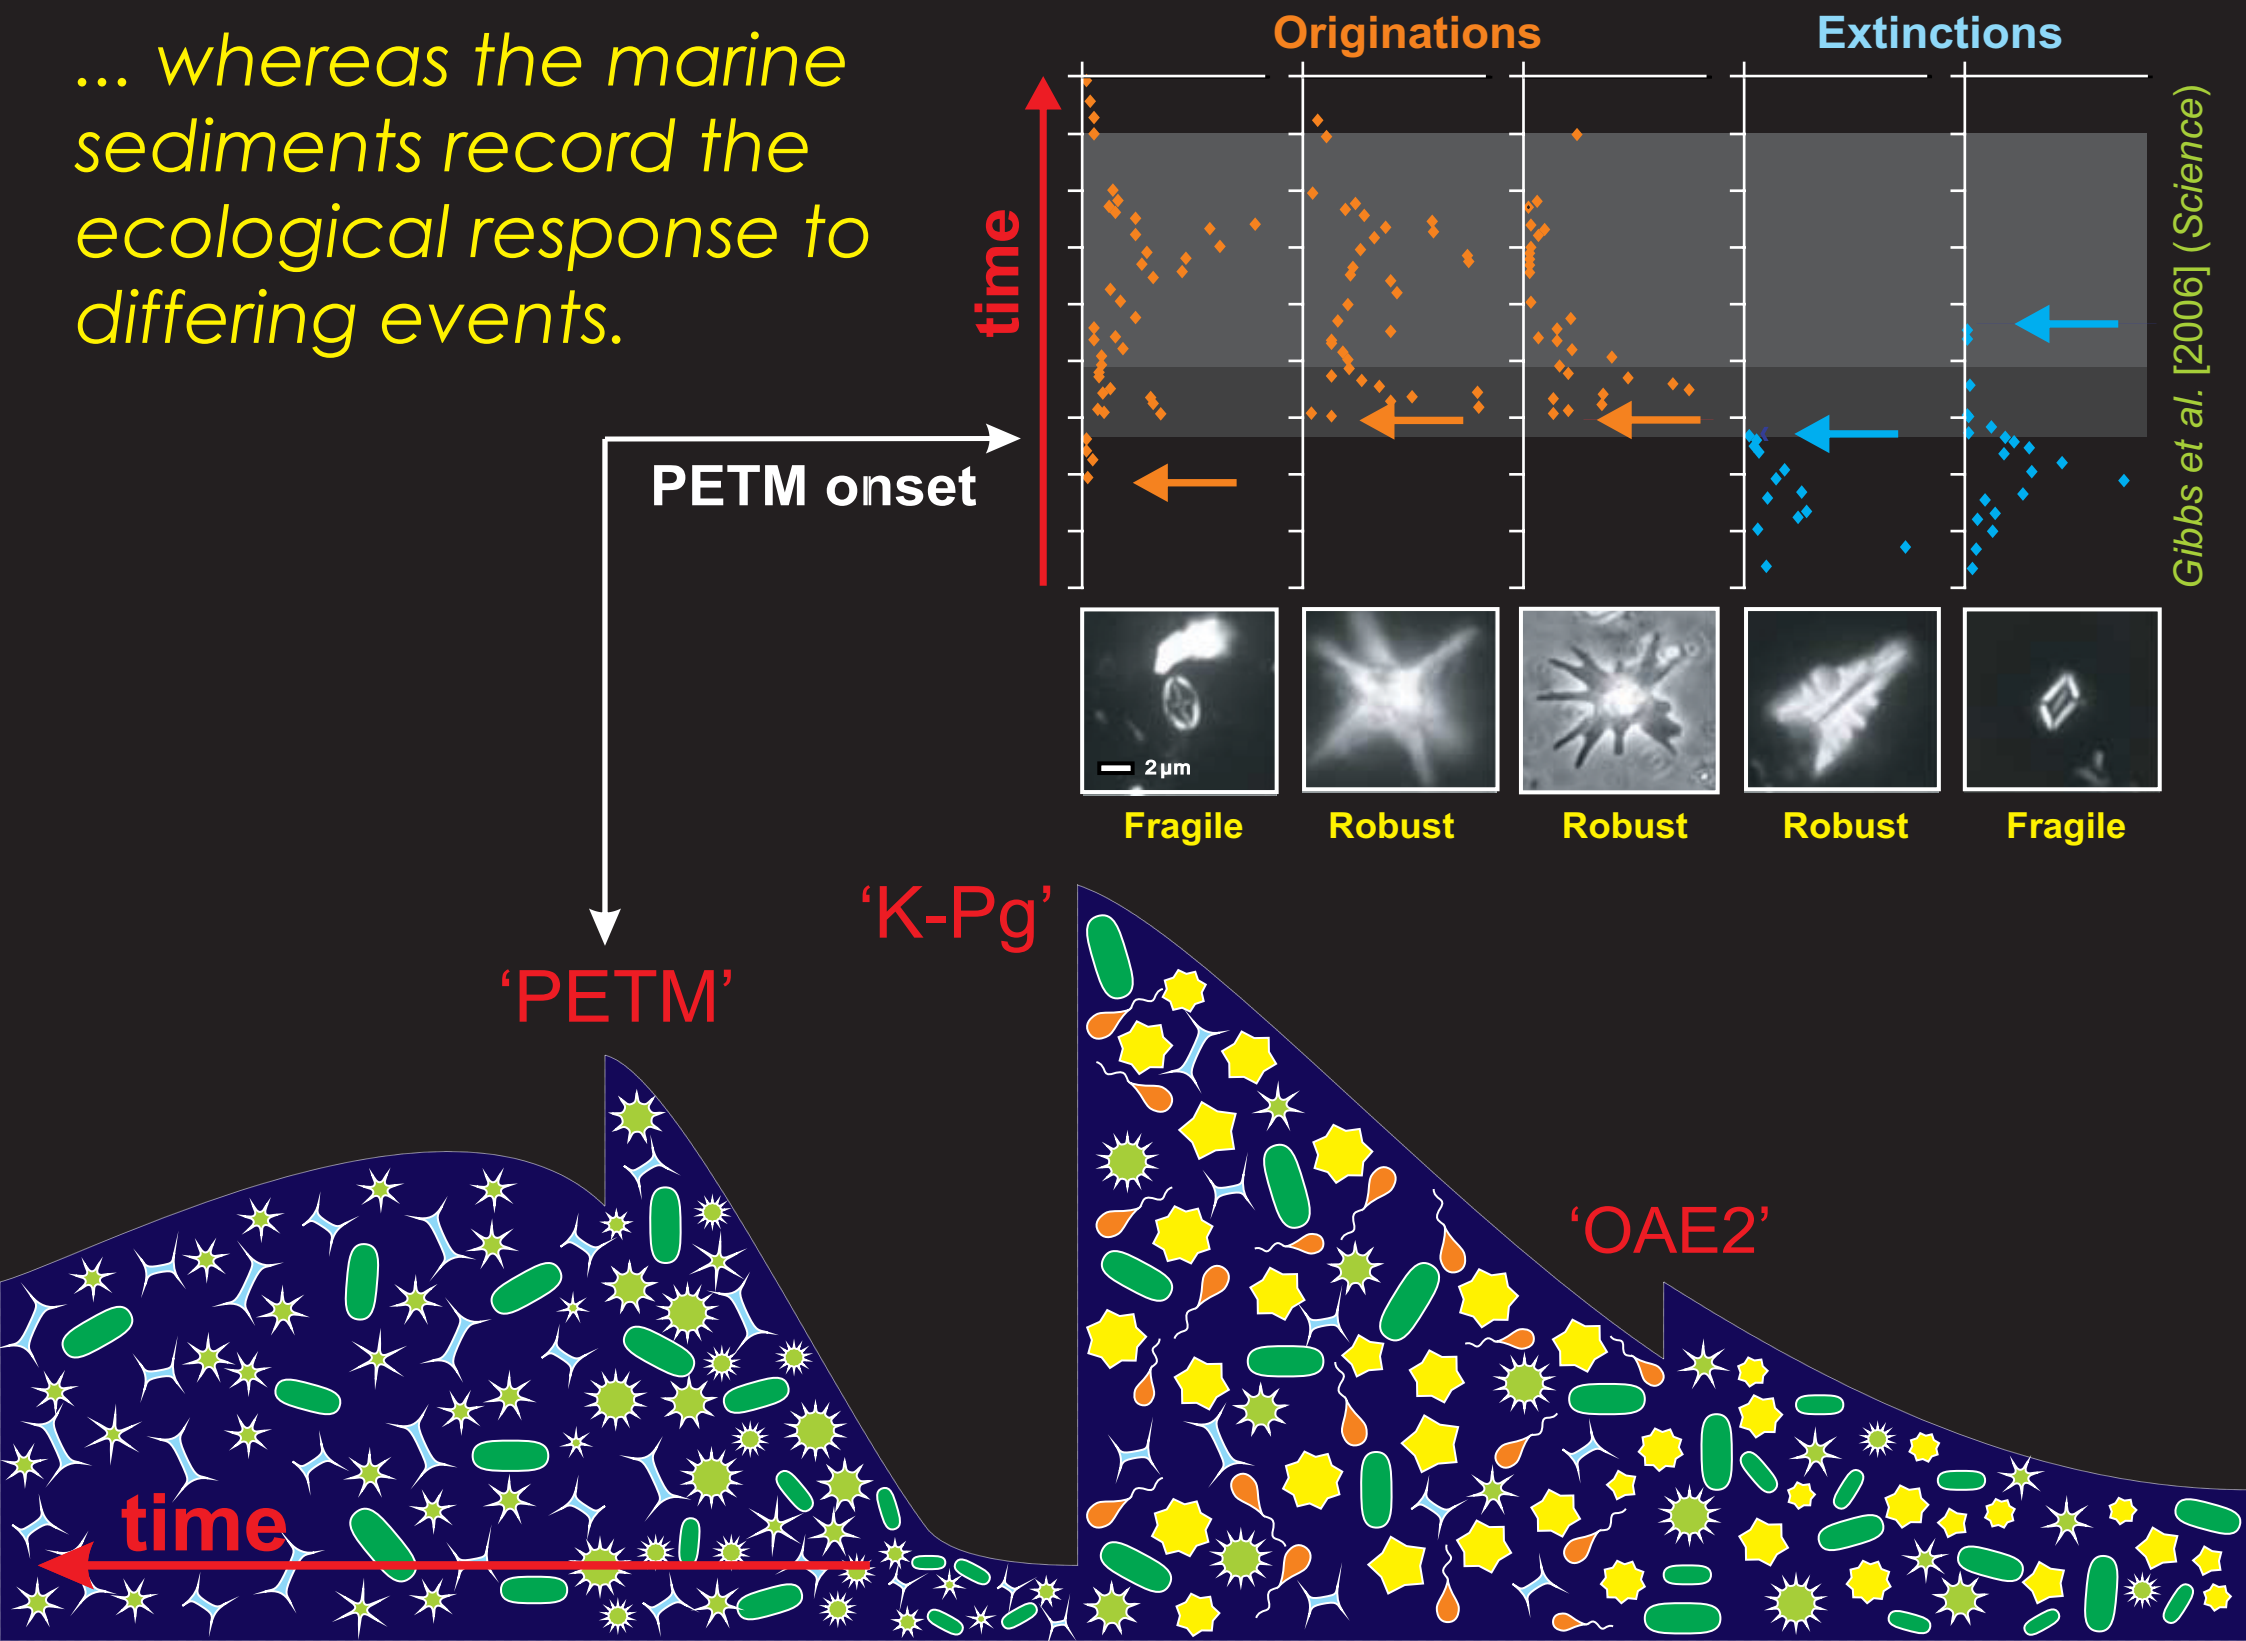

★ But had a clear data element. And a clear set of hypotheses. And a roadmap to how it was all going to be achieved.

Hypothesis: Do two wrongs make a right (?)

*Established approaches to predicting our future oceans generally fail to address species adaptation or ecosystem-level responses to environmental change ...*

... whereas the marine sediments record the ecological response to differing events.

# PALEOGENiE

Previously, I ...

- ★ Was (and still am) lead developer of 'GENIE' Earth system model.

My GENIE publications include 2 *Science*, 1 *Nature*, 3 *Nature Geoscience* papers.

- ★ Have held grants addressing:

- > Ocean acidification,
- > PETM role of methane hydrates,
- > Cenozoic  $\text{CaCO}_3$  cycles,
- > OAE2 trace element (Fe, Mo) and isotope cycling,
- > Geoengineering.

- ★ Have primarily focussed on a wide-range of questions surrounding **geochemical** dynamics of geological (and future) events ...

# PALEOGENiE

A novel *synthetic* ecological world to experiment with and test hypotheses:

- ★ 1,000-10,000 randomly-generated trait vectors ('plankton').
- ★ Plankton trait vectors set according to physiological 'rules' (e.g. larger cells have a higher nutrient limitation threshold).
- ★ Plankton compete and an ecosystem emerges, but ...  
*... the geochemical environment and climate co-evolves as global nutrient cycles are modified.*
- ★ At very high resolved diversity, we can explore questions of **adaptation** and rates of **evolutionary change** by spawning new plankton with perturbed characteristics.

# PALEOGENiE

A radical paleo model-data concept:

- ✳ Bring together ecological and global biogeochemical cycle modellers, micropaleontologists, and software engineers.
- ✳ e.g. test hypotheses for delayed recovery (100s of kyr) from end Cretaceous extinction.
- ✳ e.g. determine which factor(s) best explain ecological responses to PETM carbon release.
- ✳ Gain understanding about future ecosystem stability (+ proof concepts for future models).

# ERC Consolidator Grant workshop

## The ~~10~~ 7 Commandments

- ★ **Needs an idea you have thought through. And moreover, ideally one you are really fired up about.**
- ★ **The idea needs to be ambitious. Can (and should?) be risky.**
- ★ (There must be some advantage if you are towards the end of the eligibility period, or rather, you are less likely to be marked down.)
- ★ (Maybe not worth worrying to the  $n$ -th degree about budget justification. The EU will only quibble with the details of many of the items during negotiation anyway ...)
- ★ If passed the 1st stage: 'Practise' interviews. Seem to generally be a 'good thing'.
- ★ Thou shalt not attempt to travel to Brussels the same day as the interview. Especially if thou travelest via the Star-of-Euro.
- ★ Do try and remember to follow the instructions ... for example: bring the set of interview slide print-outsthat were the requested ... (the ERC office staff are very nice and helpful and will save your life).

# *Past Links in the Evolution of Ocean's Global Environment and Ecology : PALEOGENiE*

(and luckily, it all ended happily ever after ...)
